

ARCANE ENGINEERING AND TRADE

INTRODUCTION

Arcane engineering and trade is an electromechanical contracting company (Grade 5) engaged in multidisciplinary engineering assignments mainly design, installation, commissioning and maintenance of electromechanical systems.

The company is founded by highly competent Ethiopian engineers with decades of experience in manufacturing and construction industries. The availability of technical talent and expertise is main core of the company's strength.

Furthermore, we have been working with our associate Indian Company, *Basupra Exim International*, Maharashtra, India, Qingdao East Power Industry Equipment Co., Ltd, China, and many other companies from different countries, in areas of Electromechanical and Automation involving Industrial turnkey projects and parts supplying.

Vision

To operate as a best class organization in diversified engineering fields and demonstrate an indigenous organization can achieve world level engineering excellence.

Mission

Committed to provide high quality engineering service through better understanding of our customer's needs and building long term, mutually beneficial relationships with them.

Our Objectives

- Execute major engineering projects to current engineering standards.
- Provide innovative engineering.
- Promote the highest standards of ethical conduct in all our customer relationships.
- Become “**the partner of preference**” among stakeholders.
